Summary

Frontend Engineer with 5+ years of experience building web and mobile applications for enterprise clients including CarrefourSA, Hepsiburada, Dünyagöz, and RedBull. Core expertise in React, Next.js, TypeScript, and React Native (Expo). Experienced in developing scalable CMS platforms, delivering mobile apps end-to-end, and implementing performance-optimized solutions. Reduced development cycles by 20% through reusable component libraries and standardized architectures.

Technical Skills

- **Core:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frontend:** React.js, Next.js, Vue.js, Nuxt.js, React Native
- **State:** Redux Toolkit, RTK Query, Zustand, Context API
- **API:** REST, GraphQL, Axios, JWT, Strapi
- **Styling:** Tailwind, SCSS/SASS, Styled Components, Bootstrap
- **UI:** Shadcn UI, Material UI, Ant Design
- **Animation:** GSAP, Framer Motion
- **Forms:** React Hook Form, Formik, Yup, Zod
- **Testing:** Jest, ESLint, Prettier
- **Build:** Webpack, Vite, Turbopack, npm, pnpm
- **Version Control:** Git, Vercel, Netlify, Heroku
- **Backend:** Node.js, NestJS, ASP.NET MVC, Laravel
- **Performance:** Code Splitting, Lazy Loading, Image Optimization, Web Vitals

Professional Experience

Code and More — May 2023 – Current
Software Engineer (Frontend) — *Istanbul, Turkey*

– Led frontend development for 10+ enterprise projects including **CarrefourSA B2B**, **CarrefourSA EDI**, **CarrefourSA Corporate**, **CarrefourSA Investor Relations**, **Hepsiburada Corporate**, **Dünyagöz**, and other projects such as **Ferre** and **EasyFishoil**—integrating a **unified React-based CMS platform** across all projects and implementing **AI solutions** where applicable.

– Pioneered **React Native (Expo)** mobile development, delivering the **Dünyagöz mobile application** from concept to production.

– Enhanced and maintained the proprietary **React-based CMS platform** used across company projects, creating a scalable and reusable architecture.

– Implemented **dual-architecture solutions** combining React CMS backends with **SEO-optimized ASP.NET MVC frontends**.

– Reduced development cycle time by **20%** via reusable component libraries and standardized workflows using React and TypeScript.

– Owned existing large-scale projects such as **Dünyagöz Web** and **MeritBrass**, delivering new features, modernization, and long-term improvements.

Epigra — Jan 2021 – May 2023
Frontend Developer — *Istanbul, Turkey*

– Delivered high-impact frontend solutions using **JavaScript, React, Next.js, Vue, Nuxt, Bootstrap, SCSS, and Statamic CMS**. Key projects include:

   * **RedBull GrandMaze:** Built an interactive video-based digital experience
   * **Eku:** Developed a scalable corporate website
   * **Eczacıbaşı Corporate:** Delivered a responsive, SEO-optimized site
   * **Epigra Corporate:** Developed the agency's corporate website with modern UI/UX and interactive elements

– Contributed to 10+ additional projects including Acıbadem University, Santa Farma, and ESA Esports—ensuring consistent UI quality and responsive design across all applications.

Exclusive Creatives   **Sep 2019 – Oct 2020**

Frontend Developer   *Istanbul, Turkey*

- Translated design mockups into responsive, cross-browser interfaces with **98% pixel-perfect accuracy**.
- Reduced bundle size by **35%** through JavaScript refactoring and asset optimization, improving page load speed.
- Built a scalable **Sass-based architecture**, decreasing style-related bugs by **40%** and improving maintainability.
- Developed JavaScript-driven interactive modules, boosting user engagement by **22%**.

Vitamin   **Sep 2018 – Sep 2019**

UI Developer   *Konya, Turkey*

- Implemented responsive layouts aligned with design systems and **W3C accessibility standards**.
- Built smooth scroll-based animations and micro-interactions, enhancing UX by **15%**.
- Supported senior developers in maintaining and refactoring existing web applications.
- Participated in peer code reviews, improving team code quality and consistency.

Side Projects

- Developed several projects using Framer including Fortune, Parade, Podcast Absolute, Saturation, and Symbol. Created high-quality templates and custom components for clients, showcasing interactive and modern web experiences with React infrastructure.

- Project links:

    - Fortune (https://usefortune.framer.website/)

    - Parade (https://www.parade.ai/)

    - Podcast Absolute (https://www.podcastabsolute.co/)

    - Saturation (https://saturation.io/)

    - Symbol (https://usesymbol.framer.website/)

- Currently developing **Spron – AI Content Creator for Growing Businesses**, focusing on automating content creation and streamlining workflows. Visit the landing page: Spron Landing Page.

- Currently developing a mobile app for learning English vocabulary using **React Native (Expo)**. Users swipe cards to test their knowledge, creating an interactive and gamified learning experience. The app is in active development and will be published soon.
